

Create a patient

Add a patient to the active workplace's patient register.

1

Open the patient register

Where you are: The patient register shows patients at your active workplace.

What to do: Check that you are working in the correct workplace before continuing.

Complete when: The Patient register heading and Create patient button are visible.

2

Start creating the patient

Where you are: You are in the patient register.

What to do: Select Create patient.

Complete when: The new patient form opens.

3

Enter patient details

Where you are: The new patient form is open.

What to do: Enter the patient's first and last name, then review the details.
