

Delete a private exercise

Permanently delete a private exercise that you no longer need.

1

Open the exercise

Where you are: The private exercise is in your library.

What to do: Open the exercise details.

The screenshot displays the 'Exercises' section of the PhysioWorkplace Clinical workspace. The left sidebar contains navigation links: Dashboard, Patients, Programs, Exercises (highlighted), and My favourites. The main content area is titled 'Library' and 'Find an exercise or create your own'. It includes a search bar with the placeholder 'Search title, tags, body regions, or instructions' and a '+ Add exercise' button. Below the search bar are navigation arrows, a '+ Add filter' button, and a 'Clear filters' button. The results section shows '14 results' and displays four exercise cards. The first card, 'Temporary balance exercise', is marked as 'Private' and has a red circle with the number '1' next to its thumbnail. The other three cards are 'Public': 'Sit-to-stand', 'Single-leg balance', and 'Shoulder wall slide'. Each card includes a thumbnail image, the exercise name, its privacy status, a brief description, and a list of associated body regions (e.g., Hip, Knee, Thigh for Sit-to-stand).

Complete when: The exercise editor opens.

2

Select Delete exercise

Where you are: The exercise editor is open.

What to do: Select Delete exercise at the bottom of the panel.

Complete when: A confirmation dialog opens.

3

Confirm deletion

Where you are: The dialog explains that the action cannot be undone.

What to do: Select Delete.

Complete when: The exercise is permanently deleted.

4

Check the result

Where you are: You are back in the exercise library.

What to do: Search for the deleted exercise title.

Complete when: No exercises match the search.
